Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 06 January 2005.

2a) This action is **FINAL**. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Response to Amendment

1. This action is in response to request for re-consideration filed on 01/06/2005.
2. New claims 21-33 filed by the applicant has been entered.

Quotations of U.S. Code Title 35

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Specification Objection

7. The amendment filed 01/06/2005 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the paragraph beginning on page 8, line 27 and ending on page 9, line 11 includes the new matter “RequirementFulfillment objects encapsulate information related to levels of fulfillment of requirements by design alternatives and their related functions”. Applicant directed the Examiner to page 3, lines 21-25 of the original application as follow:

“The invention also facilitates sophisticated queries on the object models to extract interesting information from the totality of stored information. The invention is advantageous for many reasons, including the ability for multiple people with different roles to access and extract the information in ways that are meaningful to their role.”

The subject matter “RequirementFulfillment objects” is a new object model which has never been mentioned before in the application as filed. Furthermore, extracting “interesting information from the totality of stored information” and for “multiple people with different roles to access and extract the information in ways that are meaningful to their role” do not define the subject matter of “levels of fulfillment of requirements by design alternatives and their related functions”.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

8. Claims 21, 26 and 32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which

Art Unit: 2121

was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amendment pages 3, 4 and 5 with respect to claims 21, 26 and 32, respectively, contains a new subject matter of "a requirement fulfillment interface for processing queries related to levels of fulfillment of requirements encapsulated in product requirement objects by respective designs encapsulated in said design alternative objects" which has not properly described in the application as filed.

First, the "requirement fulfillment interface" is a new interface in applicant's invention which has never been defined before at the time of filing.

Second, the functionality of the interface of processing queries related to "levels of fulfillment of requirements encapsulated in product requirement objects by respective designs encapsulated in said design alternative objects" has not properly described in the original application.

Applicant stated in the remark (see page 7 of amendment) that the result of a meeting commitments made by meeting participants defines the levels of fulfillment of design alternatives. However, Examiner could not see any description detailing this relationship in the application at the time of filing. Furthermore, Examiner could not see how by looking at the result of a commitment could defines the levels of fulfillment without a certain guideline for each level of fulfillment.

9. Claims 22-25, 27-31 and 33 depend on claims 21, 26 and 32, respectively, are also rejected under 35 U.S.C. 112, first paragraph.
